Subject: Records request for Navy/Marines pesticide-impacted soil management

(b) (6),

As discussed in our telephone conversation, the HEER Office is following up on recent complaints sent to DOH from Dr. Walter Chun concerning potential exposures to termiticide impacted soils at MCBH Kaneohe. Because there is a public health concern, DOH requests that the Navy send along relevant documents for our review at your earliest convenience, including:

- Final remediation reports for Pa Honua III, including sampling data, risk assessment conclusions, as-built documentation and institutional/engineering controls implemented to protect public safety.
- Description of outreach efforts and informational materials provided to housing residents advising them of the presence of termiticides, use restrictions in place and appropriate risk reduction measures.
- Description, including maps of LUCs and informational materials provided to contractors and others who may encounter contaminated soils during construction or other ground disturbing activities.

We are also interested in such information for other housing projects completed, underway or planned at MCBH Kaneohe.

Below, please find attached a similar request that Eric Sadoyama in our office presented first to the PPV contractor, and then to Brad Davis. Given that we have been seeking this information through you and others for over two weeks already, and have agreed to respond to Mr. Chun within 30 days, I respectfully request that the Pa Honua III documents be delivered to me as soon as reasonably possible. PDF versions are quite acceptable for this purpose.

Please contact me at your earliest convenience if you have questions or foresee any delays in responding to this request.

Fenix,

7/10/2009

FYI, as I mentioned this morning when we were talking about your conversation with (b) (6)

Yesterday I spoke with (b) (6) the PPV Business Agreements Manager for NAVFAC Pacific (phone 474-9778). He said that he'd try to get me the documents I requested by 7/10/2009.

(b) (6),

This email follows up on our phone conversation this morning regarding pesticide-impacted soil management issues.

1. I'm looking forward to your response to the document request in my 6/19/09 email. Please contact me if you need additional clarification, or if there are revisions to your projected response date of 7/10/09.
2. Per your request, my points of contact for pesticide-impacted soils management at Army and Air Force PPV housing projects are:

Army

- a. US Army (housing): (b) (6)
- b. US Army (environmental): (b) (6)
- c. Army Hawaii Family Housing: (b) (6)

Air Force

- d. US Air Force (housing): (b) (6)
- e. US Air Force (environmental): (b) (6)
- f. Hickam Community Housing: (b) (6)

Thank you for taking the time to speak with me. I look forward to continuing to work with you on this project.

(b) (6)

Subject: OMC pesticide-impacted soil management reports

(b) (6)

I recently spoke with Robert Moriwaki of OMC regarding the management of pesticide-impacted soils at Navy and Marine Corps PPV construction sites in Hawaii. When I asked Robert for copies of final reports and as-built documents for OMC's pesticide-impacted soil management activities, Robert stated that OMC could not disclose such documents directly to me, and advised me to get them from the Navy instead. I am informed that your office is the appropriate point of contact for this request.

Therefore, I am hereby requesting copies of any documents, such as final reports and as-built documentation, relating to OMC's management of pesticide-impacted soils at Navy and Marine Corps PPV sites. I understand that such documents have been submitted by OMC to the Navy for, at a minimum, the Phase I neighborhoods of Halsey Terrace, Hokulani, McGrew Point, and Moanalua Terrace.

If you are not the appropriate point of contact for this request, then please forward this request to the appropriate person. Thank you in advance for your time and attention.
